

Create a simple calculator

Write a program to perform addition, subtraction, multiplication, and division, as shown in the following Figure:

Create an investment-value calculator

Write a program that calculates the future value of an investment at a given interest rate for a specified number of years. The formula for the calculation is:

$$\text{futureValue} = \text{investmentAmount} * (1 + \text{monthlyInterestRate})^{\text{years} * 12}$$

Use text fields for the investment amount, number of years, and annual interest rate. Display the future amount in a text field when the user clicks the Calculate button, as shown in the following Figure:
