

Create a Binary Data File

Write a program to create a file name **Exercise17_01.dat** if it does not exist. Append new data to it if it already exists. Write 100 integers created randomly into the file using binary I/O.

Store objects and Arrays in a file

Write a program that stores an array of five `int` value 1,2,3,4, and 5, a `Date` object for the current time, and the `double` value of 5.5 into a file named **Exercise17_02.dat**.
