Remove Text

Write a complete program that removes all the occurrences of a specified string from a text file. For example, invoking Exercise14.java removes the string "John" from the specified file. Your program should get the specified world and the address of file from the users.

Note: You have to use BufferedReader and BufferedWrite classes.

Occurrence of Each Letter

(*Occurrences of each letter*) Write a program that prompts the user to enter a file name and displays the occurrences of each letter in the file. Letters are case-insensitive. Here is a sample run:

```
Enter a filename: Lincoln.txt  ↵Enter
Number of A's: 56
Number of B's: 134
...
Number of Z's: 9
```
